NOTICE

For Medical Practitioners Druggists and Chamists

IN consequence of the spread of the morphia habit in Rangoon action has recently been taken by the Government of Burma to restrict dealings in the drug in that province The result of the action is that the drug may now be imported otherwise than by Government by the following persons only —

(a) A medical practitioner if the morphia is produced out of India and is imported by sea A medical practitioner is defined as a person who has been registered under the English Medical Act or who has received a medical diploma from an Indian University and practices medicine according to European methods

(b) Any pharmacist duly authorised by the Financial Commissioner of Burma to import morphia in such quantities and on such condition as the Financial Commissioner may prescribe A pharmacist is defined as a person who deals in European medicines and drugs as a means of livelihood and who has been licensed to sell morphia retail

It has been decided for the present to grant only one license for import by a pharmacist namely to the firm of Messrs J H deSouza and Company Rangoon and to limit the quantity of morphia which can be imported by them at one time to 100 oz

As there is some reason to fear that chemists and druggists in Calcutta may send consignments of morphia to Burma in ignorance of the regulations mentioned above this notice has been issued to make the regulations known to them

Flat Nanshan and West York islands—Positions and particulars given

No 460 (third publication)—The following Notice to Mariners (No 1105 of 1905) issued by the British Admiralty is republished, in continuation of this office No 458, dated the 25th November 1905

Further information dated 24th August 1905 has been received through the Board of Trade that Mr W D Prideaux commanding U S naval collier *Nanshan*, sent from Manila to relieve the crew of the British barque *West York* wrecked on a reef south-eastward from North Danger reef in the China sea makes the following report respecting some islands and dangers between North Danger reef and Palawan —

(*a*) Flat island was found to be a flat low sandy island about 200 yards across A reef extends in an easterly direction from it for a distance of 2 to 3 miles, and several discoloured patches were observed to the N N Eastward The position of the island was ascertained to be lat 10° 48 15′ N, long 115° 50 30′ E or about 16 miles to the south eastward of the position shown on the Charts The position formerly given lat 11° 3 N, long 115° 42 E was passed over without any sign of land being observed

(*b*) Nanshan island An island (now named Nanshan) covered with small trees, and about 600 yards across was observed to be situated about 6 miles S 12° W from Flat island in approximately lat 10° 42 30′ N long 115° 49 30′ E

(*c*) West York island This island is about one mile long and half a mile broad covered with grass and trees some of which are cocoanut palms it is fringed with a reef which extends from it a quarter of a mile on the eastern side to fully 2 miles on the northern side, on the latter reef the ship *West York* was wrecked An anchorage was found in 14 fathoms coral with the north point of the island bearing S 25° W, distant 2½ miles Signs of former Chinese habitation were found, and it is apparently visited every year by fishermen from Hainau for the purpose of collecting Trapang, &c The position of the island was ascertained to be lat 11° 5 45′ N, long 115° 1 30′ E

Maty and Durour islands—positions of

No 461 (third publication) —The British Admiralty has given notice (No 1107 of 1905) that the Master of the S S *African Monarch* reports that, during the passage of his vessel from Newcastle N S W to Manila he passed between Maty and Durour islands on the north east coast of New Guinea at a distance of 7½ miles from Maty island and found the position of that island practically correct The remark on the Chart to the effect that its position was 8 miles to the eastward has therefore been erased

The approximate position of Durour island was ascertained to be N 30° E, distant 19 miles from Maty island, which places it in lat 1° 29′ S, long 142° 57 E, or about 16 miles to the westward of its present position on the Chart

PROGRESS OF EDUCATION IN BENGAL DURING THE YEAR 1904-1905

GENERAL DEPARTMENT—EDUCATION

Calcutta, the 12th December 1905

RESOLUTION—No 3354

READ—

The Report on Public Instruction in Bengal for the year 1904-1905

THE Department was in charge of Mr A Pedler, FRS, CIE, throughout the year

Primary Education.

2 The statistics of primary education shew a falling off in the number of schools from 49,093 to 48,176, or 1·8 per cent, and in attendance from 1,391,997 to 1,356,733, or 2·5 per cent This decrease is confined to lower primary schools, the upper primary schools having slightly increased in number The falling off in attendance in lower primary schools is 3·3 per cent and occurred in the Divisions of Burdwan, Rajshahi, Dacca, Chittagong and Bhagalpur Various

explanations have been suggested by the Divisional Inspectors, but none of them are altogether satisfactory The failure of crops and the prevalence of disease have been mentioned, while two Inspectors have sought an explanation in the abolition of the public examinations It appears to the Lieutenant Governor that a further explanation is called for as to the meaning of the adoption of measures for preventing the growth of "mushroom schools." The policy, introduced within the last few years, of insisting on a certain degree of efficiency before putting a school on the aided or stipendiary list, has no doubt resulted in a considerable decrease in the number of schools and of boys attending them

The question of establishing a special course of primary education for rural schools was under the consideration of the Government during the year, but as a result of the criticisms to which the original proposals of the first committee were subjected, the whole matter was after the close of the year referred to a second and larger committee, whose recommendations are now being worked out in detail by the Director of Public Instruction

The Lieutenant Governor is glad to notice the steps taken to render the guru training schools throughout the Province more popular and efficient by increasing the salaries both of pandits and of pupil teachers in training at such schools In connection with Mr Pedler's observations upon the necessity for the augmentation of the present staff of Sub Inspectors and a general increase of the subordinate inspecting agency and the proposals to which he refers, the Lieutenant-Governor considers it sufficient to note that an elaborate scheme for the addition of a number of Assistant Inspectors, Deputy Inspectors and Sub Inspectors, including guru instructors, has been submitted to the Government of India

Effect has been given to the principle laid down by the Government of India that no school final examinations should in any case be required or allowed in the case of pupils who are not leaving school, and public examinations during or at the end of the primary school course have been abolished together with the printed certificate to which hitherto importance has apparently been attached Objections have been raised in some quarters to this change as affecting the attendance at schools but the Lieutenant Governor is convinced that the reform is a most necessary and beneficial one, and His Honour trusts that the objections will be found to be transitory Simultaneously with, and as a consequence of this change, the method of awarding scholarships has been altered into a combination of selection and competition, the lower primary school examination being mainly *viva voce*, it has thus become possible to judge of the circumstances and intelligence of the candidates more accurately than was formerly the case

Secondary Education

3 While the number of secondary schools increased by 12 and that of pupils studying the high school course by 806 there was a general falling off in attendance at secondary schools similar to that which occurred in the case of primary schools This decrease, which amounted to 4,091, was most marked in the case of middle vernacular schools and is attributed to the conversion of those schools into middle English Mr Pedler observes that in many middle schools the majority of the pupils belong to the primary stages and that these schools would probably be more efficient as upper primary schools only The public examination for middle schools was abolished, and scholarships were awarded by examination of selected candidates Judged by the results of the Calcutta University Entrance examination the standard of teaching in high schools improved during the year While the number of candidates decreased by 176 the number of passes rose by 128, the improvement being mostly found in the case of unaided schools Nine collegiate schools, however, show less favourable results than in the preceding year

It is satisfactory to notice that 10 B classes and 5 C classes attached to high schools were at work during the year, the former are elementary engineering or technical classes preparatory to the Civil Engineering College, which the scholars usually join, the latter are commercial or trade classes from which scholars enter the commercial classes in the Presidency College The candidates from these classes were fewer in number than in

the previous year, but the proportion passed was about the same as last year and better than in the year before that

"With a view to giving effect to the recommendations of the Simla Conference as to affording facilities for agricultural education, the Government in 1902 approved of a proposal to provide one or two secondary schools in each Inspector's circle with gardens, and in certain selected schools to open agricultural classes as an experimental measure The elements of agriculture are now being taught in six schools

While there are 4,163 teachers in high schools who are graduates or have passed the F A or Entrance examination or are trained vernacular masters, the Lieutenant Governor regrets to observe the large number (2,361) who do not possess any of these qualifications These figures indicate the urgent necessity for making more adequate arrangements for the training of teachers It is satisfactory to notice, however, that there is a steady increase in the number of masters who are receiving training in first grade Government training schools

Collegiate Education

4 There was a slight increase in the number of pupils attending the Arts Colleges Of 3,238 candidates who appeared at the F A Examination 1,013, or 31 9 per cent passed These figures contrast unfavourably with those of the preceding year, when the percentage of passes was 34 8 The number of students who appeared at the B A examination was 2,003, or 29 less than in 1903 1904, but the results of the examination show a marked improvement The percentage of success in Government Colleges was 33 5 against 19 7 in the preceding year in aided colleges 2 80 against 19 8 and in unaided colleges 16 4 against 10 1 The number of candidates for the M A degree was 192 as against 200 in the previous year, and the percentage of passes among regular students showed a falling off from 39 2 to 0 9 per cent There was a marked improvement in the percentage of success in the B L examination, which rose in institutions under public management from 15 to 37 8, and in those under private management from 33 3 to 41 7

The subject of commercial education was under consideration during the year The commercial classes which were opened in the Presidency College in 1903 had not proved successful, and the Lieutenant Governor referred the matter to a Committee on which the Bengal Chamber of Commerce, the Bengal National Chamber of Commerce and the Calcutta Trades Association, as well as the Education Department, were represented As a result of their recommendations two courses of studies were prescribed, the one being a complete day course, including modern English and English correspondence, Arithmetic, Book keeping, Shorthand writing and Type writing, Commercial History and Geography and a second language, and the other consisting of evening lectures on a number of optional subjects, such as Political Economy, Banking and Currency, Commercial and Industrial Law and Annuities and Insurance, in addition to some of the subjects prescribed for the day course Rules were framed regulating the admission to these classes and to the examination for the Commercial certificate The evening classes were opened in March and the day classes in June The Lieutenant Governor is glad to observe from Mr Pedler's report that these classes appear likely to become very popular and successful, the number of students which stood at 0 on the 31st March having risen to about 120 at the beginning of the new session

The most important fact in the history of collegiate education during the year is the commencement of the working of the new Universities Act A new Senate of the University has been formed and the Director reports that committees were appointed and began the work of producing a new body of regulations The subject of residential college has been occupying Sir Andrew Fraser's attention, a new college, purely residential, has been nearly completed at Dacca, the Patna College is being improved in this respect, and the scheme for a model college at Ranchi has been greatly advanced, liberal subscriptions having already been received and measures taken for the selection of a site and the acquisition of land Mr Russell as Assistant Director of Public Instruction made an enquiry during the year into the condition of students' hostels and messes in Calcutta His report showed

that the rules on the subject which had been issued in 1900 were completely ignored and that the conditions under which the students lived were incompatible with discipline He suggested various measures of reform, the main principle being that each college should have its own hostels and messes and that students of more than one college should not be allowed to reside together The question was referred to a Committee which recommended that each college should have its own mess, each mess being strictly limited to the students of a single college, and while admitting it to be at present impracticable to apply the same principle to hostels, hoped that hereafter the rule might be extended to them also A further recommendation was that hostels not attached to colleges should be under the control of a committee with power to recognize hostels which they considered worthy of recognition A special officer was appointed as Inspector of Students' Hostels and Messes and the Government accepted the financial responsibility for a scheme of hiring houses for students An enquiry was also instituted as to the conditions under which students live in colleges in the interior

Muhammadan Education

5 The number of Muhammadans attending schools or colleges decreased by 3 1 per cent during the year but the result of the University examinations shows an improvement A scheme for the improvement of Muhammadan education in *maktabs* was sanctioned by the Government It is proposed to open model *maktabs* in Calcutta and in the 12 districts where there is a large proportion of Muhammadans and to appoint inspecting maulvis to organize the existing schools and to report on their claims to receive grants in aid The complete introduction of the scheme, however, must be held in abeyance until the Local Self Government Act is amended so as to allow of the transfer of funds by Government to District Boards for expenditure on *maktabs* and of the grant of aid by District Boards to these institutions

Technical Education

6 The only college in the Province which imparts technical education is the Sibpur Civil Engineering College The figures of attendance show a slight falling off in all the departments of the school except the electrical, and the results of the examinations are distinctly worse than in the previous year The percentages of passes for the B E, F E, Overseer and Sub Overseer examinations all fell short of those reached in 1903 1904 The results of the F E examination are reported to have been deteriorating since 1902 The discipline of the college is not quite so satisfactory as usual The attempts made to improve the health of the college did not meet with much success All these facts are of interest in connection with the decision at which the Government has arrived to transfer the Engineering College to Ranchi, a change which, it is hoped, will have the effect of increasing its popularity and of improving the health and discipline of the students The Bihar School of Engineering also shows a slight falling off in attendance, but there is a decided improvement in the Dacca School, where the numbers rose from 117 to 189 The Government School of Art shows satisfactory results on the Industrial Art side, but the work done on the Fine Art side was disappointing While the students appear to have attained a fair proficiency in the usual course of drawing and painting, they showed a great lack of interest in higher artistic work The scheme of the gallery which had been found to be misleading to Indian students was given up, and more than two thirds of the collection of European pictures were sold The gallery will now be an Art section of the Indian Museum, representing Indian Art The Lieutenant Governor regards this change with satisfaction as introducing a sounder principle into the school, and it is hoped that it may result in a stimulus being given to the study of fine art

Female Education

7 The statistics of female education offer a contrast to the general decrease in numbers which has been noted in the preceding paragraphs The number of girls' schools increased by 4 9 per cent and the attendance by 5 8 per cent, while the number of girls attending mixed schools showed an increase of 4 8 per cent The rate of progress is, it is true, slower than in the previous years, but the high percentage then shown could hardly have been maintained The Lieutenant Governor has perused the remarks of the Inspectresses of Schools

as to the necessity for an extension of the zanana system of teaching for higher class girls, and His Honour hopes that more will be done in this way to foster an interest in female education

European Education

8 One of the most interesting but at the same time one of the most disappointing, sections of the report is that which deals with the subject of European education Judged by the results of examinations there has been a distinct loss of efficiency It appears that in the number of passes in the first division in the various examinations there was a remarkable falling off, and that, except in arithmetic, the work was mediocre or indifferent, the results in girls' schools being particularly bad The Inspector of European Schools attributes this state of things partly to the poor prospects of the teaching profession which offers so little attraction that recruitment has become practically impossible, and partly to the unsatisfactory courses of studies in secondary schools While History and Geography are neglected, an attempt is made to teach such subjects as Physiology Physics and Political Economy, which, if they are to be studied profitably, require a sound basis of general education The result is that the quality of the teaching is poor and the educational training largely valueless The political consequences of such a state of things cannot be regarded with indifference, for, restricted as Europeans and Eurasians are in their choice of the means of livelihood, their educational fitness is a matter of great importance It appears that even the Roman Catholic schools with their unpaid voluntary service of teachers are unable to do full justice to the task they have undertaken Mr Hornell remarks that the Government grants are small, assessed as they were to meet educational standards which have now been left behind He calculates, however, that the receipts from endowments amounted to a little more than a lakh and a quarter and the contributions from the general public probably to less than a lakh of rupees The amount met from provincial revenues was Rs 3,86,325 and from fees Rs 6,87,264 In view of these figures and of the urgent claims of the other departments of education the Lieutenant Governor cannot regard the provincial contribution as disproportionately small His Honour is very willing to help, but he is persuaded that if a higher standard of efficiency for European schools is to be aimed at and attained, it must be largely through the more liberal support of the general public

9 Sir Andrew Fraser desires to record his high appreciation of the services rendered by Mr Pedler throughout the year and to acknowledge his valuable assistance and advice in the many questions affecting the progress of education which have come before the Government

By order of the Lieutenant Governor of Bengal,

NOMINATION OF REPRESENTATIVES TO SEATS IN THE BENGAL LEGISLATIVE COUNCIL ON THE RECOMMENDATION OF MUNICIPAL CORPORATIONS AND DISTRICT BOARDS

No 4510A

RESOLUTION

APPOINTMENT DEPARTMENT

Dated Calcutta, the 9th December 1905

UNDER clauses B and C of Regulation II of the Regulations made under section 1, sub section (4), of the Indian Councils Act, 1892 for Bengal, as amended by notification No 2781(Public), dated the 29th November 1899, nominations to three seats in the Council of the Lieutenant Governor of Bengal are made by the Lieutenant Governor on the recommendation of such Municipal Corporations and District Boards as His Honour may from time to time prescribe, and under Regulation V (c) of the same Regulations, the recommendation is made by the majority of votes of the representatives appointed by the Corporations or Boards concerned

2 In the case of a vacancy in the Council, which should be filled on the recommendation of the Municipalities or the District Boards of a particular Division, the procedure followed is that, under Regulation IV of the Regulations, the Lieutenant Governor directs the Commissioner of the Division concerned to ask the Chairmen of the Municipalities or the District Boards in the Division to convene a special meeting for the purpose of selecting a member of the Municipality or the District Board to represent them for the purpose of making the recommendation for the seat in Council As soon as the electoral representatives are selected and their names reported by the Chairmen to the Commissioner of the Division concerned, they are called upon by the Commissioner to meet together at a convenient place for the purpose of electing by a majority of votes, a person to be recommended to the Lieutenant Governor to be nominated as a member of the Council The names of all candidates for membership of the Council put forward at such meeting are duly proposed* by one of the representatives present The Chairman of the meeting, reports to the Commissioner of the Division the name of the person elected by a majority of votes of the representatives present and, on behalf of the meeting, recommends to the Lieutenant Governor the nomination to the Council of the person so elected The Commissioner submits the report from the Chairman of the meeting to the Chief Secretary to Government by whom the recommendation is submitted to the Lieutenant Governor

3 Experience has shown that ignorance of the names of all the candidates standing for nomination to the Council, at the time of appointment of representatives may practically disfranchise one or more Boards or Corporations, and it is very inexpedient that a representative should vote for any person whose candidature has not been considered by the body which he is appointed to represent His Honour is of opinion that it is desirable that each Municipal Corporation or District Board should at the time of appointing a representative have before it full information regarding all candidates for nomination, for it is not unreasonable that the Board or Corporation should appoint a representative likely to vote for the candidate whom the majority wish to be nominated His Honour therefore considers it advisable to offer the following suggestions to enable the Corporations or Boards concerned to see exactly who the candidates are —

(1) The Commissioner of a Division, after receipt of the Lieutenant Governor's request for a recommendation, as provided in Regulation IV of the Regulations, while asking the Chairmen of the Municipalities or the District Boards, as the case may be, to convene special meetings for the appointment of representatives should at the same time express a desire to receive the names of any candidates for the Council who may offer themselves for recommendation

The Lieutenant-Governor is of opinion that all candidates for the Council on the recommendation of a group should be proposed and seconded by two members of one of the Municipalities or District Boards, as the case may be, included in the group by which the recommendation is to be made, and that their names, addresses and qualifications, with those of their proposers and seconders, should be reported to the Commissioner by the Chairman of the body to which the proposer and seconder in each case belong, so as to reach him not later than a month before the date fixed for the appointment of a representative under Regulation V (*c*), which date should at the same time be notified to the Commissioner It will be the business of each Chairman to see that this is done

(*ii*) The Commissioner should enter the names of candidates for the Council who have been duly proposed and seconded, with those of their proposers and seconders, and the other particulars above noted as they reach him, in a list to kept for the purpose

(*iii*) The Commissioner should circulate the list of all the names so reported to him to all Municipal Corporations or District Boards, as the case may be, included in the group, so as to reach them before the date fixed for the appointment of a representative

(*iv*) On the date on which the meeting for the purpose of appointing a representative is held, the list of candidates mentioned in the above paragraph should be circulated to each member present at the meeting

4 In paragraph 3 of this Government Resolution No 2307A, dated the 31st March 1897, it was observed —

"It will rest with the public bodies to give clear instructions to their representatives as to the way in which they should vote, that is, whether all their votes should be given to one candidate or whether the votes can be distributed between two or more candidates'

It has been held (see paragraph 6 of letter No 4646A, dated 17th November 1902, forwarded to all Commissioners with Endorsement Nos 4647 4654A, dated 17th November 1902) that these words imply that Boards and Municipalities are not authorised to direct their delegates to vote for a specified individual His Honour considers it expedient that District Boards and Municipalities should have power to bind their delegates to vote for candidates in a definite order he is, therefore, pleased, in supersession of the words above quoted in Resolution No 2307A, dated the 31st March 1897, to substitute the following words —

It will rest with the public bodies, if they see fit, to give clear and definite instructions to their representatives as to the way in which they should vote, that is, as to the candidate for whom they should vote, declaring the name of the candidate to whom all their votes should be given or if to be given to more than one candidate, the order and manner in which such votes should be given

ORDER —Ordered that a copy of this Resolution be furnished to all Commissioners of Divisions for information and guidance and for communication to all the Municipalities and District Boards in their Divisions

Ordered also that a copy be published in the *Calcutta Gazette*

Ordered also that a copy be submitted to the Government of India for information

By order of the Lieutenant Governor of Bengal,

R W CARLYLE,

Offg Chief Secy to the Govt of Bengal

REPORT OF THE COTTON CROP OF BENGAL OCTOBER 1905

THE following note is published for general information

R W CARLYLE,

Offg Chief Secy to the Govt of Bengal

The 12th December 1905

DEPARTMENT OF LAND RECORDS AND AGRICULTURE, BENGAL

REPORT OF THE COTTON CROP OF BENGAL, OCTOBER, 1905

Explanatory—Four forecasts of cotton are to be published by this Department at equal intervals of two months, viz—before the 15th of each of the months of August, October, December and February The August and October forecasts deal with estimates of the area sown and the general condition of the crop

Cotton is divided into two classes—Early and Late The former variety is sown before the monsoon rains begin and harvested early in the cold weather The latter variety is sown partly before and partly after the rainy season and harvested in the hot weather

Character of the season— The early cotton is principally grown in the Chittagong Hill Tracts, the Sonthal Parganas, Angul and in the Chota Nagpur Division Weather conditions were generally favourable for the growth of the plant Some damage is, however, reported from the Sonthal Parganas and Manbhum owing to an excess of rainfall in August and September

As regards late cotton the weather appears to be less favourable The monsoon was delayed in Bihar till about the middle of July and then followed, during the latter half of July and all through August to the middle of September, heavy and continuous rain causing floods and damage to the crop in some districts Such damage is reported from, Saran (the most important of the late cotton-growing districts), Patna, Champaran, Muzaffarpur and Bhagalpur

Area sown—The appendix summarises the district reports and shows also the five and ten years' averages of the areas under early and late cotton Since the issue of the August forecast, there is no marked increase in the area sown under early cotton The total area for the whole Province now comes to 57,500 acres against 57,039 shown in the August forecast

As for late cotton there is a marked progress in the sowings of the crop in Saran, Muzaffarpur, Darbhanga and Patna In Singhbhum, Shahabad and Cuttack sowings began towards the end of August and later, while they have not yet begun in Bhagalpur, Angul and Puri The area sown up to now is 31,677 acres against 17,200 acres shown in the August forecast

CALCUTTA,
The 10th October 1905

[On an average of the five years ending 1903-1904 the area under cotton crops in the territory to which this forecast relates has represented some 1·2 per cent. of the total area under cotton crops in British India.]

The mean pressure temperature, etc are deduced from the traces of the Barograph and Thermograph and from eye observations

The maximum and minimum temperatures are obtained from self registering thermometers All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory They are exposed under a thatched shed open at the sides and are suspended four feet above the ground

The barometer readings are corrected to those of the standard, Newman's No 86, formerly at the Surveyor General's Office

The hygrometric elements are obtained from Tables III, IV and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain gauge is one foot above the ground Rainfall reported on any day is for 24 hours preceding 8 A M of that day

Bills introduced into the Council of the Governor General for making Laws and Regulations, or published under Rule 23

GOVERNMENT OF INDIA

LEGISLATIVE DEPARTMENT

The following Bill was introduced in the Council of the Governor General of India for the purpose of making Laws and Regulations on the 15th December 1905 —

NO 11 OF 1905

A Bill further to amend the Presidency Small Cause Courts Act, 1882

WHEREAS it is expedient further to amend the Presidency Small Cause Courts Act, 1882 It is hereby enacted as follows —

Short title and commencement

1 (*1*) This Act may be called the Presidency Small Cause Courts Act, 1906, and

(*2*) It shall come into force

Amendment of section 28 Act XV 1882

2 In section 28 of the Presidency Small Cause Courts Act, 1882, after the words "such decree" the words 'and for the decision of all questions relating to such execution" shall be inserted

Amendment of section 39 of same Act

3 In section 39 of the said Act,—

(*a*) for sub section (*2*) the following shall be substituted, namely —

"(*2*) Unless the Judge is of opinion that the application has been made solely for the purpose of delay, the applicant shall be entitled to such order as of right

Provided that the removal directed by such order shall in every case be conditional upon the applicant giving security, to the approval of the Judge, for the payment, within a reasonable time to be prescribed in the order, of the amount claimed and of the costs which may become payable by him to the plaintiff in respect of the said suit", and

(*b*) in sub section (*3*) the words "(if any)" each time they occur shall be omitted

Substitution of new section for section 69 of same Act

4 For section 69 of the said Act the following shall be substituted namely —

Reference when compulsory

69 (*1*) If two or more Judges of the Small Cause Court sit together in any suit, or in any proceeding under Chapter VII of the Act, and differ in their opinion as to any question of law or usage having the force of law or the construction of a document, which construction may affect the merits or

if in any suit or any such proceeding, in which the amount or value of the subject matter exceeds five hundred rupees any such question arises upon which the Court entertains reasonable doubt, and either party so requires

the Small Cause Court shall draw up a statement of the facts of the case and the point on which there is a difference of opinion or on which doubt is entertained, and refer such statement with its own opinion on the point for the decision of the High Court and the provisions of sections 619 to 621 of the Code of Civil Procedure shall, so far as they are applicable, be deemed to apply as if such reference had been made under section 617 of the said Code

(*2*) When the Small Cause Court refers any question for the opinion of the High Court as provided in sub section (*1*), it shall either reserve judgment or give judgment contingent upon such opinion

Amendment of second schedule Act XV 1877

5 In No 11 of the second schedule to the Indian Limitation Act, 1877, after the words "the Code of Civil Procedure, the following shall be inserted, namely —"or section 28 of the Presidency Small Cause Courts Act, 1882"

STATEMENT OF OBJECTS AND REASONS

THIS Bill has been drawn to remove certain defects in the existing law governing Presidency Small Cause Courts to which attention has recently been called

2 Of these the first is that according to the decision in *Deno Nath Batabyal* v *Adhor Chunder Sett* (4 C W N 470) a Presidency Small Cause Court cannot, as between an attaching creditor and the mortgagee of the judgment debtor, deal in execution proceedings with questions of title to, or determine any right to or interest in, property which is attached to immoveable property but which under section 28 of the Presidency Small Cause Courts Act, 1882, is for the purpose of execution of a decree to be deemed to be moveable property It has been represented that the result of this decision is to compel many cases to be brought in the High Court which might well be disposed of by the Small Cause Court and that the resultant expense and delay are both a hardship to litigants and depreciate the value as security of the property in question It is therefore proposed by clause 2 of the Bill to empower Small Cause Courts to dispose of such cases The right of a claimant to bring a suit if he so desires will remain the same as it is at present in other execution cases The words proposed to be added are taken from the judgment of the Chief Justice in the case referred to above

3 The second is the absence of any sufficient check on the exercise by defendants of their right under section 39 of the same Act to obtain an order for removal to the High Court of a suit instituted in a Small Cause Court in which the value of the subject matter exceeds Rs 1,000 It has been found that such orders are frequently obtained solely with a view to harassing creditors by delay, and it is seldom possible for the Judge to whom the application to transfer is made to decide on the materials before him that it has been made with this object It does not appear advisable to interfere with the right to removal, but it is proposed (see clause 3 of the Bill) to require security to be given in all cases, as in section 62 of the County Courts Act, 1888 (51 & 52 Vict, c 43)

4 The third defect in the present law is the difficulty of reading section 69 of the same Act with section 617, Code of Civil Procedure (*Ralli Brothers* v *Goculbhai Mulchand*, I L R 15 Bom 376) Section 69 has therefore been redrafted (clause 4 of the Bill) so as to prescribe the entire procedure to be followed by the Small Cause Court in making a reference to the High Court

5 The amendment of article 11 of the Second Schedule of the Indian Limitation Act, 1877, which is proposed by clause 5 of the Bill, is merely consequential on the amendment contemplated in section 28 of the Small Cause Courts Act as explained above.

Board of Revenue, be resumed on the next day following (not being Sunday or a public holiday) at the hour of 11 A M and so on until the whole of the remaining lots are disposed of, or if the whole quantity advertised shall not be sold on the day appointed, the Board of Revenue may dispose of the lots which remain on hand at a future sale

No 2, Report of the examination of such opium

17 The public are hereby informed that in providing the investment of the opium manufactured at the Patna Factory and the opium manufactured at the Ghazipur Factory for the year 1904 1905 the same precautions have been taken as those which have been observed during past years to have the drug procured and sent down in a pure state to have only the prescribed quantity of leaves used in forming the cakes and to have the due proportion of opium put into each cake An account of the weight of the drug, when packed at the Patna and Ghazipur Factories, and a statement of the average weight of the chests, indiscriminately taken for the purpose of comparison from the despatches on arrival at Calcutta, may be seen on personal application at the Office of the Board of Revenue

2 Store keepers and stock takers, whether appointed permanently or temporarily, shall furnish cash security with a bond in Form A, the amount being regulated according to circumstances by the Chairman, subject to the approval of the Corporation

3 The rule that every officer and servant who handles Municipal money shall give cash security shall not be enforced in the case of durwans, peons and orderlies but in future no durwan peon or orderly shall be appointed unless he can furnish a security bond (executed by some person of known respectability and solvency) for his good and honest conduct in the following form —

NOTICE

For Medical Practitioners Druggists and Chemists

(*b*) Any pharmacist duly authorised by the Financial Commissioner of Burma to import morphia in such quantities and on such condition as the Financial Commissioner may prescribe A pharmacist is defined as a person who deals in European medicines and drugs as a means of livelihood and who has been licensed to sell morphia retail

It has been decided for the present to grant only one licence for import by a pharmacist namely to the firm Messrs H deSouza and Company Rangoon and to limit the quantity of morphia which can be imported by them at one time to 100 oz

Bills introduced into the Council of the Governor General for making Laws and Regulations, or published under Rule 23

GOVERNMENT OF INDIA

LEGISLATIVE DEPARTMENT

The following Bill was introduced in the Council of the Governor General of India for the purpose of making Laws and Regulations on the 15th December 1905 —

NO 11 OF 1905

A Bill further to amend the Presidency Small Cause Courts Act, 1882

WHEREAS it is expedient further to amend the Presidency Small Cause Courts Act, 1882 It is hereby enacted as follows —

Short title and commencement

1 (*1*) This Act may be called the Presidency Small Cause Courts Act, 1905 and

(*2*) It shall come into force

Amendment of section 28 Act XV 1882

2 In section 28 of the Presidency Small Cause Courts Act, 1882, after the words "such decree" the words 'and for the decision of all questions relating to such execution" shall be inserted

Amendment of section 39 of same Act

3 In section 39 of the said Act,—

(*a*) for sub section (*2*) the following shall be substituted, namely —

"(*2*) Unless the Judge is of opinion that the application has been made solely for the purpose of delay, the applicant shall be entitled to such order as of right

Provided that the removal directed by such order shall in every case be conditional upon the applicant giving security, to the approval of the Judge, for the payment, within a reasonable time to be prescribed in the order, of the amount claimed and of the costs which may become payable by him to the plaintiff in respect of the said suit", and

(*b*) in sub section (*3*) the words "(if any)" each time they occur shall be omitted

Substitution of new section for section 69 of same Act

4 For section 69 of the said Act the following shall be substituted, namely —

Reference when competency

69 (*1*) If two or more Judges of the Small Cause Court sit together in any suit, or in any proceeding under Chapter VII of this Act, and differ in their opinion as to any question of law or usage having the force of law or the construction of a document which construction may affect the merits, or

if in any suit or any such proceeding, in which the amount or value of the subject matter exceeds five hundred rupees any such question arises upon which the Court entertains reasonable doubt and either party so requires

the Small Cause Court shall draw up a statement of the facts of the case and the point on which there is a difference of opinion or on which doubt is entertained, and refer such statement with its own opinion on the point for the decision of the High Court and the provisions of sections 619 to 621 of the Code of Civil Procedure shall, so far as they are applicable, be deemed to apply as if such reference had been made under section 617 of the said Code

(*2*) When the Small Cause Court refers any question for the opinion of the High Court as provided in sub section (*1*), it shall either reserve judgment or give judgment contingent upon such opinion

Amendment of second schedule Act XV 1877

5 In No 11 of the second schedule to the Indian Limitation Act 1877, after the words "the Code of Civil Procedure, the following shall be inserted, namely —"or section 28 of the Presidency Small Cause Courts Act, 1882"

STATEMENT OF OBJECTS AND REASONS

THIS Bill has been drawn to remove certain defects in the existing law governing Presidency Small Cause Courts to which attention has recently been called

2 Of these the first is that, according to the decision in *Deno Nath Bataboyal* v *Adhor Chunder Sett* (4 C W N 470), a Presidency Small Cause Court cannot, as between an attaching creditor and the mortgagee of the judgment debtor, deal in execution proceedings with questions of title to, or determine any right to or interest in, property which is attached to immoveable property, but which under section 28 of the Presidency Small Cause Courts Act, 1882, is for the purpose of execution of a decree to be deemed to be moveable property It has been represented that the result of this decision is to compel many cases to be brought in the High Court which might well be disposed of by the Small Cause Court and that the resultant expense and delay are both a hardship to litigants and depreciate the value as security of the property in question It is therefore proposed by clause 2 of the Bill to empower Small Cause Courts to dispose of such cases The right of a claimant to bring a suit if he so desires will remain the same as it is at present in other execution cases The words proposed to be added are taken from the judgment of the Chief Justice in the case referred to above

3 The second is the absence of any sufficient check on the exercise by defendants of their right under section 39 of the same Act to obtain an order for removal to the High Court of a suit instituted in a Small Cause Court in which the value of the subject matter exceeds Rs 1,000 It has been found that such orders are frequently obtained solely with a view to harassing creditors by delay, and it is seldom possible for the Judge to whom the application to transfer is made to decide on the materials before him that it has been made with this object It does not appear advisable to interfere with the right to removal, but it is proposed (see clause 3 of the Bill) to require security to be given in all cases, as in section 62 of the County Courts Act, 1888 (51 & 52 Vict, c 43)

4 The third defect in the present law is the difficulty of reading section 69 of the same Act with section 617, Code of Civil Procedure (*Ralli Brothers* v *Goculbhai Mul chand*, I L R 15 Bom 376) Section 69 has therefore been redrafted (clause 4 of the Bill) so as to prescribe the entire procedure to be followed by the Small Cause Court in making a reference to the High Court

5 The amendment of article 11 of the Second Schedule of the Indian Limitation Act, 1877, which is proposed by clause 5 of the Bill, is merely consequential on the amendment contemplated in section 28 of the Small Cause Courts Act as explained above

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN EASTERN BENGAL AND ASSAM, FOR THE MONTH OF NOVEMBER 1905

NOVEMBER 1905 has been a quite typical cold weather month

The depression that passed into the Assam Hills during the last few days of October seemed traceable into the low pressure area that lay over Burma on the 1st and 2nd November and then gradually expanded southwards while at the same time the high pressure area that had appeared over the Central Provinces expanded northwards and eastwards This transition to the proper cold weather conditions occupied the whole first week of the month The north east monsoon which was flowing down from the Himalayas over the Province on the 5th had not established itself fully in the Bay until the 7th when it was, however abnormally strong with a steep north to south pressure gradient During this transition period skies remained so perfectly clear that the temperature was well above normal during the day and somewhat below at night, the mean for the day being just slightly above normal This excess of temperature continued and increased both night and day right up to the 16th Meantime from the 10th to the 14th there had been a relapse to the very low, pressure—gradient which had characterised the transition period at the beginning of the month On the 10th the barometer began to rise again slowly over the northern land area and from that date forward the north east monsoon steadily and completely established itself The retreating monsoon gave the usual rain to South Madras, more or less all through the month but not a drop in Bengal or Assam From the 15th the temperature began to fall, and with the final establishment of the descensional air movement from over the Himalayas it soon became much colder than usual over the Province, especially at night In Bihar, however a contrary change—temperature rising above normal—took place from the 18th to the 22nd On the 23rd a similar change began in Orissa and South West Bengal but gave way again to detect over the whole Province on the 25th, and this coolness was maintained to a lessening degree up to the end of the month During all this latter part of the month a typical north east monsoon prevailed with dry winds of force only a very little less than ordinary for the season Atmospheric conditions were slightly disturbed in the Andaman Sea from the 24th to the 27th and then settled down again so that there was not a single cyclonic storm during the whole month

Summary of Pressure —Pressure was slightly below normal over the whole Province for the first four days of the month On the 5th it was just above normal in Assam North and East Bengal, while still just below in South West Bengal, Orissa, and Bihar On the 6th it rose rapidly to $\frac{1}{10}$th of an inch above normal on the 7th to $\frac{1}{7}$th, and on the 8th to $\frac{1}{8}$th and then fell again to nearly normal on the 10th and so on with minor fluctuations until it was steadily rather more than $\frac{1}{10}$th of an inch above normal from the 16th to the 24th, about $\frac{1}{10}$th above until the 27th and then again $\frac{1}{10}$th for the remaining three days of the month The average pressure for the month works out therefore to very nearly $\frac{1}{15}$th of an inch in excess of the normal average

Summary of Temperature —On the average temperature was just a trifle above normal The highest temperature recorded during the month was 92 4 at Chaibassa The two lowest were, of course, from Darjeeling, 37° 5 and from Shillong, 39° 0 Next in order for low minima come Daltonganj with 40,° Cherrapunjee 48° , and Arrah 49° 1

Summary of Rainfall —The following table gives in a condensed form the rainfall information for each of the four large meteorological divisions of Bengal for the present year up to the close of November The numbers there given as in the case of former months of the year, are the actual average rainfalls in each division expressed as a percentage of the normal fall for the period, and the last column also gives the total rainfall up to the close of November, expressed in the same way —

METEOROLOGICAL DIVISIONS	January	February	March	April	May	June	July	August	September	October	November	Actual rainfall of first eleven months of 1905 expressed as a percentage of the normal fall for the period.

The only rain reporting was a few trifling showers in Orissa and even more insignificant ones in the Darjeeling hills Hence the averages for all divisions of the Province are *nil*

The following table gives the summary of the temperature of each of the seven meteorological divisions of the provinces of Bengal and of Eastern Bengal and Assam, and rainfall data of each of the four meteorological divisions of the Province of Bengal for the month of November 1905 —

The mean pressure, temperature, etc are deduced from the traces of the Barograph and Thermograph and from eye observations

The maximum and minimum temperatures are obtained from self registering thermometers All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory They are exposed under a thatched shed open at the sides and are suspended four feet above the ground

The barometer readings are corrected of to those of the standard, Newman's No 86 formerly at the Surveyor General's Office.

The hygrometric elements are obtained from Tables III, IV and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain gauge is one foot above the ground. Rainfall reported on any day is for 24 hours preceding 8 A M of that day

17 The public are hereby informed that in providing the investment of the opium manufactured at the Patna Factory and the opium manufactured at the Ghazipur Factory for the year 1904 1905, the same precautions have been taken as those which have been observed during past years to have the drug procured and sent down in a pure state, to have only the prescribed quantity of leaves used in forming the cakes, and to have the due proportion of opium put into each cake An account of the weight of the drug, when packed at the Patna and Ghazipur Factories, and a statement of the average weight of the chests, indiscriminately taken for the purpose of comparison, from the despatches on arrival at Calcutta, may be seen on personal application at the Office of the Board of Revenue

18 Any further information respecting weight or quality of the opium advertised for sale that may be desired by parties connected with the trade will, as heretofore, be furnished to them on personal application at the office of the Board of Revenue But, in accordance with established usage, under no circumstances will the Board of Revenue entertain or recognize any claim to compensation for loss from any alleged deficiency of weight abstraction of opium, or adulteration of the drug which may be preferred on reference to chests after the sale and delivery of the opium for shipment
